Experience Center

DRAWING ROOM

The room utilizes a minimalist, warm-neutral palette that feels both luxurious and welcoming. The use of vertical fluted wall panels and soft arched moldings creates a sophisticated texture without overwhelming the senses.

“Always home, even when you’re not.”

HOME THEATRE

The centerpiece is the large projection screen, perfectly integrated into the wall unit. It demonstrates how a professional cinema experience can coexist with elegant home decor. The cove lighting in the ceiling and the decorative wall sconces highlight how smart lighting can change the mood of a room at the touch of a button.

“The house that thinks for itself.”

Experience Center

MASTER BEDROOM 1

The bedroom experience at our centre is designed as a sanctuary where sophisticated interior design meets the intuitive ease of modern automation. This space demonstrates how a private retreat can transition seamlessly from a bright, productive morning to a deeply relaxing, dim-lit evening through integrated circadian lighting and automated climate control.

“
Finally, a house that actually listens.

MASTER BEDROOM 2

Every element, from the soft acoustic wall paneling to the hidden high-fidelity audio, is curated to prove that advanced technology doesn't have to disrupt the peace of a bedroom—it should enhance the comfort, privacy, and well-being of the person within it.

“
Safety you can see, Comfort you can feel.
